The reference was cited in a European Search Report dated September 28, 2007 received from the European Patent Office. Applicants are submitting a copy of the above-cited reference required by 37 C.F.R. §1.98(a)(2)(i) and (ii), together with a copy of the European Search Report. The relevance of the reference is described in the Report. It is further respectfully submitted that the other two references cited in the Report, namely, EP 0 171 866A (1986) and Rudy, et al. The relevance to the pending U.S. patent application is that the Search Report issued in a foreign patent application relating to the same subject matter. However, no independent analysis of the Search Report, the accuracy of the statement of the foreign examiner or the claims of the foreign application under the laws of that country or the United States relative to the subject matter claimed in the present application has been made; the present understanding of the contents thereof by the undersigned being based on the foreign examiner's comments submitted herewith.
